### Brainstorm & Idea Prioritization Template:

Brainstorming provides a free and open environment that encourages everyone within a team to participate in the creative thinking process that leads to problem solving. Prioritizing volume over value, out-of-the-box ideas are welcome and built upon, and all participants are encouraged to collaborate, helping each other develop a rich amount of creative solutions.

Use this template in your own brainstorming sessions so your team can unleash their imagination and start shaping concepts even if you're not sitting in the same room.

### Step-1: Team Gathering, Collaboration and Select the Problem Statement

How might we create an online shopping experience that feels simple and smooth for everyday users? Most people find it annoying to browse through complicated websites just to buy something basic. I wanted to build something where you can open the app, find what you need, and order it without any confusion. That's the core idea behind ShopEZ.

### Step-2: Brainstorm, Idea Listing and Grouping

- What if products were organized into clear categories like Electronics, Clothing and Books so users don't have to search randomly?
- What if admins could add and remove products easily from a dashboard without touching any code?
- What if users could register, login and have their own cart saved to their account?
- What if stock availability and ratings were shown on each product card so users can decide faster?
- What if there was a search bar to find any product within seconds?
- What if the whole app was responsive and worked on both desktop and mobile?

### **Step-3: Idea Prioritization**

After thinking through all the ideas, I decided to build a full stack e-commerce platform using the MERN stack. The app has a product catalog with category filters, a cart system, order tracking and a separate admin dashboard. I chose this because it covers the most important needs of both the buyer and the seller, and it was something I could realistically build within the internship timeline.
