

Ideation Phase

Empathize & Discover

Date	9 June 2026
Team ID	
Project Name	ShopEZ
Maximum Marks	4 Marks

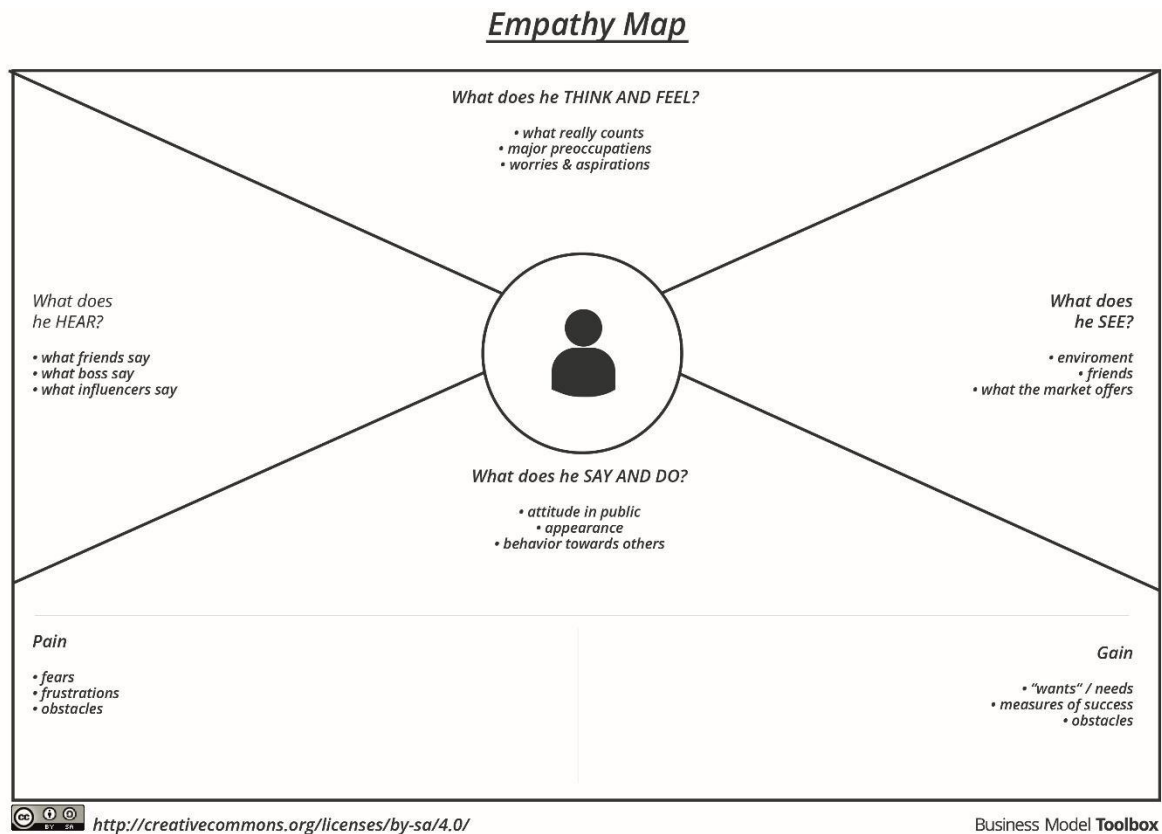

Empathy Map Canvas:

An empathy map is a simple, easy-to-digest visual that captures knowledge about a user's behaviours and attitudes.

It is a useful tool to help teams better understand their users.

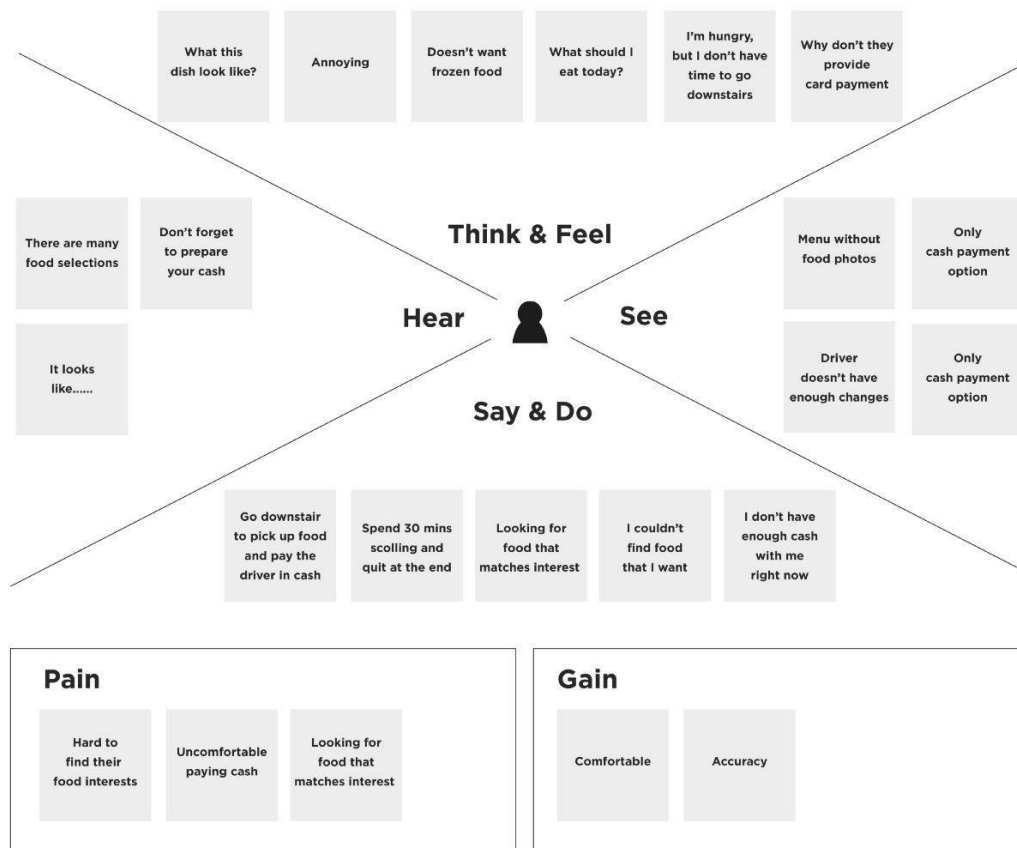

Creating an effective solution requires understanding the true problem and the person who is experiencing it. The exercise of creating the map helps participants consider things from the user's perspective along with his or her goals and challenges.

Example: Food Ordering & Delivery Application

Empathy Map - ShopEZ User

Think & Feel:

- I want to find what I need quickly without getting confused
- I worry about whether the product quality will match the photos
- I feel good when I can see the price and stock clearly before buying

See:

- Other people shopping easily on apps like Amazon and Flipkart
- Friends getting things delivered quickly through simple apps

Hear:

- People saying online shopping saves a lot of time
- Friends recommending apps with good filters and search

Say & Do:

- Searches for products using the search bar
- Filters by category to narrow down choices
- Checks stock and rating before placing an order

Pain:

- Too many steps to complete a purchase
- Confusing navigation on most shopping websites

Gain:

- Simple and clean product browsing experience
- Quick add to cart and easy checkout
- Admin can manage everything from one dashboard
