

Project Design Phase-II Data Flow Diagram & User Stories

Date	31 January 2025
Team ID	
Project Name	
Maximum Marks	4 Marks

Data Flow Diagrams:

A Data Flow Diagram (DFD) is a traditional visual representation of the information flows within a system. A neat and clear DFD can depict the right amount of the system requirement graphically. It shows how data enters and leaves the system, what changes the information, and where data is stored.

Example: [\(Simplified\)](#)

Flow

1. User configures credentials for the Watson Natural Language Understanding service and starts the app.
2. User selects data file to process and load.
3. Apache Tika extracts text from the data file.
4. Extracted text is passed to Watson NLU for enrichment.
5. Enriched data is visualized in the UI using the D3.js library.

Example: DFD Level 0 (Industry Standard)

ShopEZ Data Flow:

1. User opens the browser and visits localhost:3000
2. React frontend sends a request to Express backend at localhost:5000
3. Express processes the request and queries MongoDB
4. MongoDB returns the data to Express
5. Express sends the response back to React
6. React displays the data to the user

User Stories

Use the below template to list all the user stories for the product.

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance criteria	Priority	Release
Customer (Mobile user)	Product Catalog	USN-6	As a user, I can browse all products on the home page	Products are displayed with name, price, image and stock	High	Sprint-2
Customer (Web user)	Product Catalog	USN-7	As a user, I can filter products by category	Only products from selected category are shown	High	Sprint-2
Customer (Web user)	Product Catalog	USN-8	As a user, I can search for products by name	Matching products appear in real time	Low	Sprint-2

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance criteria	Priority	Release
Customer (Web user)	Cart	USN-9	As a user, I can add a product to my cart	Product appears in cart with correct quantity	High	Sprint-3
Customer (Web user)	Orders	USN-10	As a user, I can place an order from my cart	Order is saved and cart is cleared	High	Sprint-1
Administrator	Product Management	USN-11	As an admin, I can add a new product	Product appears in the catalog immediately	High	Sprint-4
Administrator	Product Management	USN-12	As an admin, I can edit or delete a product	Changes reflect immediately on the home page	High	Sprint-4
Administrator	Order Management	USN-13	As an admin, I can view all orders placed by users	All orders shown with user details and items	Medium	Sprint-4
